### **DETAILED ACTION**

The Advisory Action mailed 04 August 2004 is hereby vacated. The Request for Continued Examination filed was incorrectly indexed as an After-Final Amendment. This action is responsive to the Request for Continued Examination filed 23 July 2004.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 23 July 2004 has been entered.

#### ***Original Patent***

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

#### ***Oath***

The reissue oath/declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

#### ***Claim Rejections - 35 USC § 251***

Claims 1-23, 28-34 and 40-71 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the Declaration is set forth in the discussion above in this Office action.

Examiner acknowledges Applicant's concerning the Original Patent, the Oath and the Declaration. The above rejections and requirements will be maintained until such time the corrective actions discussed by Applicant are provided.

***Allowable Subject Matter***

The amendment filed 23 July 2004 overcomes the outstanding art rejection applied to claims 59-61, 68 and 69. Independent claims 69, 68 and 69, well as new claim 70, recite a method wherein the first current is a "reference current" from a "first current source that is powered by the supply voltage" that has a "temperature coefficient that is independent of the supply voltage" and wherein the second current is a "supply-related current that is powered by the supply voltage" having a similar "temperature coefficient" and is "related to the supply voltage". Since none of the cited prior art references disclose a circuit including the presently recited method, the claims are now seen to allowable in view thereof.
